FACT SHEET- TURKEY

ABOUT:

Turkey officially the Republic of Turkey, is a country bridging Europe and Asia. It shares borders with Greece and Bulgaria to the northwest; the Black Sea to the north; Georgia to the northeast; Armenia, Azerbaijan, and Iran to the east; Iraq to the southeast; Syria and the Mediterranean Sea to the south; and the Aegean Sea to the west. Turks form the vast majority of the nation's population and Kurds are the largest minority. Turkey's capital is Ankara while its largest city and financial center in Istanbul.

One of the world's earliest permanently settled regions, present-day Turkey was home to important Neolithic sites like Göbekli Tepe, and was inhabited by ancient civilizations including the Hattians and Anatolian peoples. Hellenization started in the area during the era of Alexander the Great and continued into the Byzantine era. The Seljuk Turks began migrating in the 11th century, and the Sultanate of Rum ruled Anatolia until the Mongol invasion in 1243, when it disintegrated into small Turkish principalities. Beginning in the late 13th century, the Ottomans started uniting the principalities and conquering the Balkans, and the Turkification of Anatolia increased during the Ottoman period. After Mehmed II conquered Constantinople in 1453, Ottoman expansion continued under Selim I. During the reign of Suleiman the Magnificent, the Ottoman Empire became a global power. From the late 18th century onwards, the empire's power declined with a gradual loss of territories and wars. In an effort to consolidate the weakening empire, Mahmud II started a period of modernization in the early 19th century. The Young Turk Revolution of 1908 brought limitations to the authority of the Ottoman Sultan, allocating power to the Ottoman Parliament, and ushered the empire into a multi-party period. The 1913 coup d'état effectively put the country under the control of the Three Pashas, who were largely responsible for the Empire's entry into World War I in 1914. During World War I, the Ottoman government committed genocides against its Armenian, Assyrian and Pontic Greek subjects. After the Ottomans and the other Central Powers lost the war, the Ottoman Empire was partitioned. The Turkish War of Independence against the occupying Allied Powers resulted in the abolition of the Sultanate on 1 November 1922, the signing of the Treaty of Lausanne (which superseded the Treaty of Sèvres) on 24 July 1923 and the proclamation of the Republic on 29 October 1923. With the reforms initiated by the country's first president, Mustafa Kemal Atatürk, Turkey became a secular, unitary and parliamentary republic; which was later replaced by a presidential system with a referendum

in 2017. Since then, the new Turkish governmental system under President Recep Tayyip Erdoğan and his party, the AKP, has often been described as Islamist and authoritarian.

Turkey is a regional power and a newly industrialized country, with a geopolitically strategic location. Its economy, which is classified among the emerging and growth-leading economies, is the twentieth-largest in the world by nominal GDP, and the eleventh-largest by PPP. It is a charter member of the United Nations, an early member of NATO, the IMF, and the World Bank, and a founding member of the OECD, OSCE, BSEC, OIC, and G20. After becoming one of the early members of the Council of Europe in 1950, Turkey became an associate member of the EEC in 1963, joined the EU Customs Union in 1995, and started accession negotiations with the European Union in 2005.

NATIONAL FLAG:

The flag of Turkey, officially the Turkish flag (Turkish: Türk bayrağı), is a red flag featuring a white star and crescent. The flag is often called al bayrak (the red flag), and is referred to as al sancak (the red banner) in the Turkish national anthem. The current design of the Turkish flag is directly derived from the late Ottoman flag, which had been adopted in the late 18th century and acquired its final form in 1844. The measures, geometric proportions, and exact tone of red of the flag of Turkey were legally standardized with the Turkish Flag Law on 29 May 1936.

GEOGRAPHY

Turkey, country that occupies a unique geographic position, lying partly in Asia and partly in Europe. The country has a north-south extent that ranges from about 300 to 400 miles (480 to 640 km), and it stretches about 1,000 miles from west to east. Turkey is bounded on the north by the Black Sea, on the northeast by Georgia and Armenia, on the east by Azerbaijan and Iran, on the southeast by Iraq and Syria, on the southwest and west by the Mediterranean Sea and the Aegean Sea, and on the northwest by Greece and Bulgaria. The capital is Ankara, and its largest city and seaport is Istanbul.

- Turkey's western Mediterranean region enjoys a characteristically Mediterranean climate, with hot dry summers and moderately warm and rainy winters.
- Central Anatolia shows characteristics of a continental climate due to its elevation, but as you move south and east, it becomes a cold, semiarid climate.

ECONOMY

Economic Overview

Turkey's largely free-market economy is driven by its industry and, increasingly, service sectors, although its traditional agriculture sector still accounts for about 25% of employment. The automotive, petrochemical, and electronics industries have risen in importance and surpassed the traditional textiles and clothing sectors within Turkey's export mix. However, the recent period of political stability and economic dynamism has given way to domestic uncertainty and security concerns, which are generating financial market volatility and weighing on Turkey's economic outlook.

Current government policies emphasize populist spending measures and credit breaks, while implementation of structural economic reforms has slowed. The government is playing a more active role in some strategic sectors and has used economic institutions and regulators to target political opponents, undermining private sector confidence in the judicial system. Between July 2016 and March 2017, three credit ratings agencies downgraded Turkey's sovereign credit ratings, citing concerns about the rule of law and the pace of economic reforms.
