

Optiemus Telematics  
Private Limited

RFID ENABLED E-SEALS FOR SEAMLESS  
MOVEMENT OF CONTAINERS IN INDIA

Listed company on BSE and NSE

[www.optiemus.com](http://www.optiemus.com)

## About Us

Optiemus Infracom is a familiar name in Indian Telecom Space with over two decades of experience and more than 3,000 employees. The group operates in end to end telecom ecosystem and is also listed across all the major stock exchanges in the country. In 2015, we entered into a joint venture with Wistron Corporation of Taiwan to set up world class manufacturing facilities for Smartphone and Smart devices in India under Make in India initiative.

Optiemus Telematics Pvt. Ltd marks the entry of Optiemus Group into the field of telematics, bringing to this industry its core philosophy of always introducing world class technology with speed and scalability. Optiemus Telematics welcomes its customers to a new era in B2B transactions with end to end digital experience starting from online procurement to easy to use cloud hosted applications, all customized to provide you with agility, visibility and security in your logistics operations.

Our servers keep a track of the seals sold to each IEC code, and only those can be selected by you. Once the information is uploaded cannot be edited. This now becomes viewable in the trip logs panel and the same is intimated to the Customs personnel at the ports through our servers automatically.

# TRIP LOGS AVAILABLE FOR VIEWING BY EXPORTER.

All In Use Used													
Qty Number	E Seal Number	Box Number	Shipping Bill	Date of Shipping Bill	Date of sealing	Time of sealing	Container Number	Trailer - Truck Number	Destination customs station of export	Date of scan(arrival of truck at customs station)	Location of scanned seal	Result of scan(Tampered/Intact)	Intimation Letter for customs department

These items get auto filled once the information has been entered into our website. They cannot be edited.

We have created a feature which automatically converts all information required to be intimated to jurisdictional superintendent into a printable letter format for exporter convenience.

# THE READER APPLICATION

# SEAL VERIFICATION

Our readers communicate with the servers at the time of scanning to determine whether the seal being scanned is valid; i.e. they have been bought by an exporter and all required information has been correctly uploaded. It also checks for physical tampering such as a seal being cut and welded together.

# TRIP LOGS UPDATED IN REAL TIME AFTER SCAN.

All In Use Used													
Qty Number	E Seal Number	Box Number	Shipping Bill	Date of Shipping Bill	Date of sealing	Time of sealing	Container Number	Trailer - Truck Number	Destination customs station of export	Date of scan(arrival of truck at customs station)	Location of scanned seal	Result of scan(Tampered/Intact)	Intimation Letter for customs department

## TIME AND DATE \* LOCATION OF SCAN \* RESULT OF SCAN

These data fields get conveyed to the EXPORTER on the TRIP LOGS PANEL as well via EMAIL after his seal has been scanned. The same 3 fields get updated and conveyed to customs the moment the seal is scanned at the port.
