1.3.3 Packing Instructions

A General Packing Instructions

It is recommended that whenever possible, exhibit be packed in cases and/or crates suitable for return shipments.

It is also recommended that contents be securely choked, blocked and braced to be protected against multiple handling during transit. Please ensure:

- * All cases should be bolted rather than screwed or nailed.
- * Stapled or Stitched-nailed crates or cartons should not be used except for disposable goods.
- * If cases cannot be slung, they should be mounted on skids to facilitate the handling with forklifts.
- * Exhibitor, at their discretion, may plan to exhibit equipment on skid, as the floor may not always be completely level. These skids must however be suitably covered to preserve the overall presentation of the exhibition.
- * To minimize risk of loss, damage or delay, avoid shipping your exhibit in small packages (individual package for over 1 CBM is recommended, e.g. 1m x 1m x 1m). We recommend you use the big strong case with small cartons collected together inside.

B Protection against Damage and Rain

Please be advised that exhibits will be placed outdoors many times including open-air storage at the exhibition site. It is recommended that the packing of case must be strong enough to protect the exhibits from damage and rain. The carton package is not recommended, as it is not suitable for repeated handling and repacking. Any damage and claims will not be accepted to the unsuitable carton packages.

C Special Attention to Oversize and Overweight Exhibits

Cases for heavy exhibits should be so constructed that the sides are jointed by bolts rather than by nails or screws. This will prevent the case from being damaged during unpacking and will save considerable time, especially during repacking. Please mark the front side of the case clearly to ensure correct positioning. Please ensure that you have adequate and appropriate packing materials for repacking.

1.3.4 Marking Instructions

A Please mark all the packages with the following information on a shipping label:

EXHIBITION: INTERDYE 2019

EXHIBITOR: _____ BOOTH NUMBER: _____

PIECE NUMBER: _____ of TOTAL PIECES _____

GROSS WEIGHT: _____ KGS

DIMENSION (M): _____ L x _____ W x _____ H

B Please apply at least two shipping labels to the different sides of one package.

C In addition to the above, the following markings should be shown on the sides of the cases where applicable:

- * Label fragile items on all sides.
- * Items that must be kept in upright position, on 2 sides label This Side Up.
- * Items which cannot be stored outdoors must be marked on 2 sides with the umbrella symbol.
- * Stripes should be painted on vessels, tanks and similar equipment to indicate where slings must be placed for hoisting, also label SLING in the proper location.
- * Cases containing spare parts must be marked SPARE PARTS and contain only spare parts.
- * CENTER OF GRAVITY, FRONT and RACK signs must be clearly marked externally for uneven loads and bulky items.
- * Other markings should conform to the International Rules and Regulations governing packing signs and symbols.
