RRMA ANNUAL REGULATORY CONCLAVE 2026

Navigating the Emerging Regulatory Landscape Affecting Chemicals and Supply Chains:

Business Impacts and Opportunities

07 th December 2026

Jio World Convention Centre, Mumbai

Event Topic and Session Overview ,

Date: 7 December 2026
Venue: Jio World Center, BKC, Mumbai

The 5th RRMA Annual Event 2026 is organized by RRMA in collaboration with two leading organizations: Global Product Compliance (GPC), serving as RRMA's technical knowledge partner, and CHEMEXCIL, serving as Council Partner. Together, these collaborations bring technical expertise and an industry perspective to the event. Under the theme "Navigating the Emerging Regulatory Landscape Impacting Chemicals and Supply Chains: Business Impacts and Opportunities," the event will explore how evolving regulations are shaping chemical compliance, product design, sustainability, supply chains, digitalization, and international market access. The program features three technical sessions followed by a panel discussion, each addressing a distinct aspect of this changing regulatory landscape.

Technical Session 1 – Safe and Sustainable by Design: From Green Chemistry to Regulatory Strategy
The first technical session focuses on the growing connection between regulatory requirements, sustainability, product design, and supply chains. It will cover the EU Safe and Sustainable by Design (SSbD) framework and its implications for R&D and product development, together with the Packaging and Packaging Waste Regulation (PPWR), the Digital Product Passport, CBAM, and EUDR. The session will examine how these developments are influencing businesses and exporters, particularly in relation to product development, packaging, sustainability requirements, supply-chain information, and compliance with EU market requirements.

Technical Session 2 – Beyond PFAS: The Emerging Universe of Substances of Concern
The second session will focus on the increasing regulatory attention on substances of concern. PFAS will be an important part of the discussion, together with endocrine-disrupting chemicals, PBT/vPvB substances, PMT/vPvM substances, and the wider universe of substances receiving greater regulatory scrutiny. The session will also address the transition from substitution to phase-out and the harmonization of GHS and global classification systems, with reference to developments in Europe, Canada, Japan, and other markets.

Technical Session 3 – Digitalization of Regulatory Compliance
The third technical session will focus on the growing role of digital tools in regulatory compliance. As companies manage regulatory requirements across multiple substances, products, and markets, digital systems are becoming increasingly important for identifying applicable requirements and managing compliance risks. The session will cover digital platforms, the QSAR Toolbox, using AI to predict compliance risks, identifying applicable regulations, and global compliance management and risk assessment systems for product portfolios.

Panel Discussion – Free Trade Agreements: Opportunities for India

The panel discussion will focus on the opportunities created by Free Trade Agreements for Indian industry, while also examining the practical regulatory challenges faced by exporters in international markets.

The discussion will look at how existing FTAs can support market access while companies continue to manage local regulatory requirements in destination markets. Practical case examples from Korea, the European Union, and the United Kingdom will be used to highlight the challenges exporters face in complying with local regulations and how these requirements can affect business opportunities and market access.

Overall, the event will bring together the key regulatory developments currently affecting the chemical industry and supply chains, with a focus on their practical impact on businesses, exporters, and international trade.

Sincerely,
Regulatory Representatives and Managers Association (RRMA)

AGENDA

MONDAY
7th December 2026

09:00 – 09:30	**REGISTRATION & MORNING NETWORKING**	Tea, coffee, and morning networking
09:30 – 10:15	**INAUGURAL SESSION**	Inaugural Session, welcome address, RRMA activity report, keynote, Chief Guest address
10:15 – 11:30	**TECHNICAL SESSION 1**	Safe and Sustainable by Design: From Green Chemistry to Regulatory Strategy
11:30 – 12:00	TEA BREAK	
12:00 – 13:15	**TECHNICAL SESSION 2**	Beyond PFAS: The Emerging Universe of Substances of Concern
13:15 – 14:15	LUNCH BREAK	
14:15 – 15:30	**TECHNICAL SESSION 3**	Digitalization of Regulatory Compliance
15:30 – 16:00	TEA BREAK	
16:00 – 16:50	**PANEL DISCUSSION**	Free Trade Agreements: Opportunities for India
16:50 – 17:10	**CLOSING SESSION**	Key takeaways, vote of thanks
17:10 – 17:40	TEA BREAK	
17:40 – 19:30	**RRMA GENERAL ASSEMBLY**	
19:30 ONWARDS	DINNER & COCKTAILS

ABOUT RRMA

RRMA is a membership-based association that promotes understanding of regulatory compliance and capacity building for industries. RRMA is a body representing regulatory professional and helping industries and businesses to comply with the regulatory requirements to help them meet global regulatory expectations efficiently.

Further, RRMA enables regulatory professionals to organize and identify key regulatory requirements, develop capacity to prepare for such requirements, and install monitoring mechanisms which in their turn maintain compliant business operations with minimum regulatory risks.
